# KELVIN KIBET

Kariobangi, Nairobi | 0746 293 892 | kelvinkibet339@gmail.com

## PROFESSIONAL SUMMARY

Information Security and IT graduate with practical exposure to cybersecurity operations, security monitoring, network security, vulnerability assessment and end-user IT support. Hands-on experience with FortiSIEM security event monitoring, FortiGate firewall support, security alert and log review, Acunetix vulnerability scanning, email security, Active Directory and network troubleshooting.Foundation in networking, cyberdefense, SOC concepts and ethical hacking fundamentals, supported by practical labs in Cisco Packet Tracer and Windows Server. Interested in applying this technical background to cybersecurity training and learner support while continuously developing in emerging areas such as cybersecurity automation and AI.

## CORE CYBERSECURITY & TECHNICAL SKILLS

| | |
|---|---|
| **Cybersecurity & SOC** | Security monitoring, security alerts and log review, cyberdefense fundamentals, security incident troubleshooting, endpoint security |
| **Network Security** | FortiGate firewall support, TCP/IP, IP addressing, DNS, DHCP, LAN troubleshooting, VLANs, VPN fundamentals, routing and switching fundamentals |
| **Vulnerability & Ethical Hacking** | Acunetix vulnerability assessment scanning, system risk identification, ethical hacking and penetration-testing fundamentals |
| **Systems & Identity** | Windows 10/11, Windows Server, Active Directory, user accounts, password resets, Group Policy fundamentals |
| **IT Support** | Hardware/software troubleshooting, workstation setup, Windows troubleshooting, printers/peripherals, Microsoft Office 365, email configuration |

## PROFESSIONAL EXPERIENCE

### eMobilis Technology Training Institute — IT Support Intern | Nairobi | October 2026 – Present

- Supporting day-to-day IT operations and technical activities within a professional technology training environment.
- Assisting with workstation, hardware and basic network troubleshooting, including Wi-Fi connectivity issues.
- Supporting users with basic technical issues and developing practical problem-solving and communication skills.
- Gaining hands-on exposure to IT support, systems in a technology training environment.
- Updating computers ensuring they are up to date and working as expected.
- Perform data entry and update information in Microsoft Excel, maintaining accuracy and completeness of records

### ICT Authority — Information Security Department | Attachment | Nairobi | January 2026 – March 2026

- Monitored enterprise security events using FortiSIEM and reviewed security alerts and system logs.
- Assisted with FortiGate firewall administration and supported network and perimeter security activities.
- Assisted in troubleshooting network security incidents and diagnosing connectivity-related issues.

- Conducted vulnerability assessment scanning using Acunetix and supported identification of system risks.
- Supported Active Directory user account administration, Microsoft Office and email configuration.
- Supported enterprise email security and assisted with identifying and responding to email-related threats.
- Worked closely with IT teams to maintain secure, reliable and available IT services.

**ICT Authority, Huduma Centre — IT Department | Attachment | Kisumu | May 2023 – August 2023**

- Provided first-level IT and end-user support by diagnosing and resolving hardware, software and network issues.
- Diagnosed LAN and internet connectivity problems using TCP/IP and networking fundamentals.
- Assisted with DNS and DHCP configuration within Windows environments.
- Supported Active Directory user account management, password resets and access requests.
- Troubleshot Windows operating-system issues, software installations, user profiles and email configuration.
- Installed, configured and maintained computers, printers and peripheral devices.
- Performed system updates and preventive maintenance to improve system reliability.

## EDUCATION

**Bachelor of Science in Information Security & Forensics** — KCA University | 2023 – July 2026

**Diploma in Information Technology** — KCA University | 2021 – 2023

**KCSE** — Koelel High School | 2021

## PROFESSIONAL STRENGTHS

- Strong technical troubleshooting and structured problem-solving• Clear professional communication and user support
- Fast learner with willingness to develop new cybersecurity technologies
- Attention to detail and reliability
- Team collaboration and ability to work independently
- Continuous learning and professional development

## PROFESSIONAL DEVELOPMENT

Continuously developing practical skills in cybersecurity, networking, systems administration and security operations, with hands-on practice using Cisco Packet Tracer, Windows Server, Active Directory, DNS, DHCP, FortiSIEM, FortiGate and vulnerability assessment tools.
